# HEWLETT PACKARD

Non-Glossy Plotter Paper

Ideal for everyday and quantity use, this non-glossy paper has been especially designed to provide top performance when used with HP's fiber-tip paper pens.
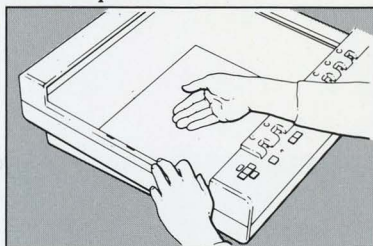

1 Before you begin

- *Leave paper in package until ready to use.* This will prevent dust from accumulating, and will ensure crisp, clear graphics.
- *Handle paper only along the edges.* The paper surface must be free of fingerprints for ink to adhere properly.
- *Paper is packed with best writing side up.*

2 Loading the paper
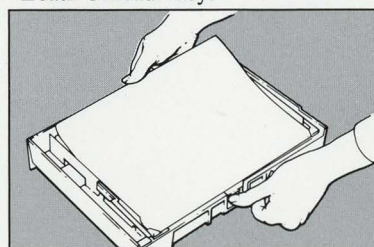

For HP 7220, 7221, 7225, and 9872 plotters

Press "Chart Load" button. Place paper on platen. Smooth away air bubbles with the back of the hand. Press "Chart Hold" button.

---

For HP 7550 plotter

Manual loading — Place paper on platen. Move paper until it is flush with left edge of platen and aligns with A/A4 mark (or B/A3 mark, if appropriate) on platen. Both upper edges of paper must be under grit wheels. Press "Auto Feed" key until an asterisk appears on display directly beneath "Auto Feed" key. Press "Load/Unload" key.

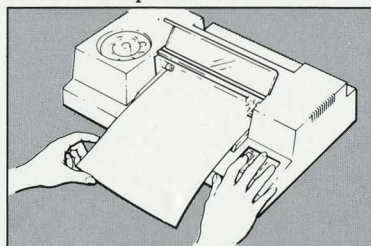

Automatic loading — Remove paper tray (be sure tray and paper size correspond). Press down black tab in rear of tray and insert paper (150 sheets maximum). Paper corners must be under tabs. Slide tray into plotter. Press "Auto Feed" key until an asterisk appears on display directly beneath "Auto Feed" key. Press "Load/Unload" key.

For HP 7090, 7470, and 7475 plotters

Place paper on platen. Raise loading lever to the "Paper Load" position. Move paper until it sits squarely against paper stop or against white line. Lower lever to "Paper Hold" position.

For ColorPro plotter

Place paper on platen. Move paper until it is flush with white line on platen. Press "Load" button.

For instructions on loading non-glossy paper in your HP drafting plotter, consult your User's Manual.

3 Setting plotter speed

Use a maximum speed of 50 cm/s (HP-GL command "VS 50").

---

4 Tips for better charts

Text charts
- Use darker colors for lettering.
- For titles, use wide-line (0.7 mm) pens.
- For labels, use narrow-line (0.3 mm) pens.

Line charts
- Use wide-line pens to enable viewer to distinguish data easily.

Solid-fill areas
- For smoothest area fills, use narrow-line pens.

5 Storing finished plots

Keep plots in a folder away from light. Place a blank sheet of paper between plots.

6 HP plotter supplies

Get best results from your Hewlett-Packard plotter with genuine HP supplies. HP offers a complete line of plotter supplies: new transparency film, glossy paper, and non-glossy paper, as well as new fiber-tip transparency pens and fiber-tip paper pens, both available in 10 new colors and 2 line widths.
